Questions:

Why is it not continuous when we are in school if every 15 minutes we are certain someone in the building is using water?

Is there any way that rain water can affect our water usage reading? We never had this happen before the drains in the building were redone.

Does it make sense that there was intermittent water usage during the middle of the night?

What is the difference between "Leak" column and "Consumption Flag"?

Why are there 2 meters on our water bills? How long has there been 2 meters?

Notes:

Heat boiler turned off mid-June to end of Sept.

There has been no leak in boiler in #1 which provides hot water to the building.
