Status	Action	Comment
	Utilize 95% of allocated funding each fiscal year to implement stormwater separation program to reduce inflow (surface water) in sanitary sewer system	Complete 2022 funds allocated
	Complete build of East Bayshore sewage pumping station in 2021, where historical bypass events have occurred	Complete
	Develop a business case as part of the 2022 budget process to undertake a city-wide slope stability review	Complete / Not Proceeding Hazard lands are identified in the City's Official Plan. The policies of the Official Plan restrict the usage of hazard lands for the preservation and conservation of lands in their natural state. For any development adjacent to Hazard lands, the City requires the preparation of an Environmental Impact Study (EIS) with respect to the potential impact on the slope, and any mitigation identified as required needs to be completed as part of the development. Additionally, the Grey Sauble Conservation Authority has mapped the areas of natural hazard contained within the Official Plan Update and provides recommendations to the City when an EIS is required.
	Develop business case as part of the 2022 budget process to undertake a storm water master plan	In Process Master Stormwater Plan and Drainage Study approved in capital budget for 2024 and 2025
	Update purchasing bylaw to implement strategic procurement to enable integrated project delivery and a formal supplier performance program by December 2022	In Process Review/Revision to be completed internally in fall 2022. Council approval scheduled for Q1 of 2023.
	Identify partnerships to develop or enhance a check-in program for vulnerable populations by December 2021	Not Started Project is deferred to begin in 2023
	Implement a comprehensive business planning process as part of the 2022 budget to ensure financial and human resources are available to implement identified actions successfully	Complete Standard work plan templates have been introduced with cross-functional review by strategic leadership team to confirm priorities at beginning of each year
	Develop a climate change adaptation lens tool to utilize in a review of all administrative policies	In Process Expected completion in 2023
	Utilize the Official Plan update, and other development-related policy initiatives, to create a framework for protecting and enhancing the City's natural infrastructure	Complete Official Plan adopted by the City in June 2021 and approved by Grey County February 2022
	Utilize the Refreshed Strategic Plan to clearly establish key results measuring progress towards the environment and identify regular reporting intervals to Council on progress	Complete The Strategic Plan Refresh identified Green City as a Council priority and included 5 Key Results (KRs) to achieve the objective of "Enhancing the City's resiliency and capacity for mitigating and adapting to the impacts of climate change. Supporting and promoting healthy lifestyles." KR1 - Offset 100 tonnes of CO2 per year by annually planting 100 hardwood tree species KR2 - Protect, repair, remediate 90% of the City's impacted shoreline from wave action and high water KR3 - Increase tonnage collected at household hazardous waste days by 10% KR 4 - Develop a waste management strategy by June 2022 KR5 - Develop a climate mitigation plan as part of a Climate Action Strategy that incorporates the 2021 Corporate Climate Change Adaptation Plan The actions being taken to achieve these key results are reported on quarterly to the Operations Committee
